

## Interton. Essential hearing.

Founded in Germany in 1962, Interton today is part of one of the world's largest hearing aid organizations, the GN Group. We use their proven core technology in a way that falls in line with our own way of doing things. We believe that most people need a straightforward, functional and easy-to-use hearing solution at a fair price. So that's what we give them.

## ELIPSE SUPER POWER WHEN YOU NEED MAXIMUM VOLUME

**SUPER POWER**

INTERTON | **ELIPSE**

## The Elipse super power hearing aid

Designed specifically for people who want maximum amplification, Elipse gives you power – and lots of it. But power alone is not enough, which is why Elipse includes all the features you need to hear speech clearly, even in noisy situations.

### Enjoy conversations

Elipse makes it easier for you to enjoy conversations with friends and family, even in noisy environments. That's because it amplifies the soft sounds in speech, which are essential for understanding words, while suppressing unwanted background noise.

### Freedom from feedback

If you've used hearing aids before, you may have experienced feedback – a whistling sound that can be disturbing and sometimes even embarrassing. You won't have this problem with Elipse. Elipse monitors the frequency range where feedback is likely to occur, and minimizes the chance of feedback – so you get great sound and nothing else.

### Choose your sound

When your Elipse is fitted, your dispenser will fine-tune it so that it delivers the right sound for you. Elipse can be pre-set with your preferred settings for loud environments, group conversations or phone calls. You can then choose the setting you need to suit the listening situation you are in.

With Elipse, you get a powerful, high-quality hearing aid at an affordable price.

- Up to 685 hours of battery life
- Easy-to-operate volume control
- Feedback reduction, that minimize the risk of disturbing sounds
- Noise reduction, for unwanted background noise
- 3 comfort programs with push button control and audible signal tones
- Direct Audio Input (DAI) for compatibility with FM systems
- Telecoil for better hearing with telephone and assisting listening devices
- Super power with up to 86 dB gain and 145 dB\* output
